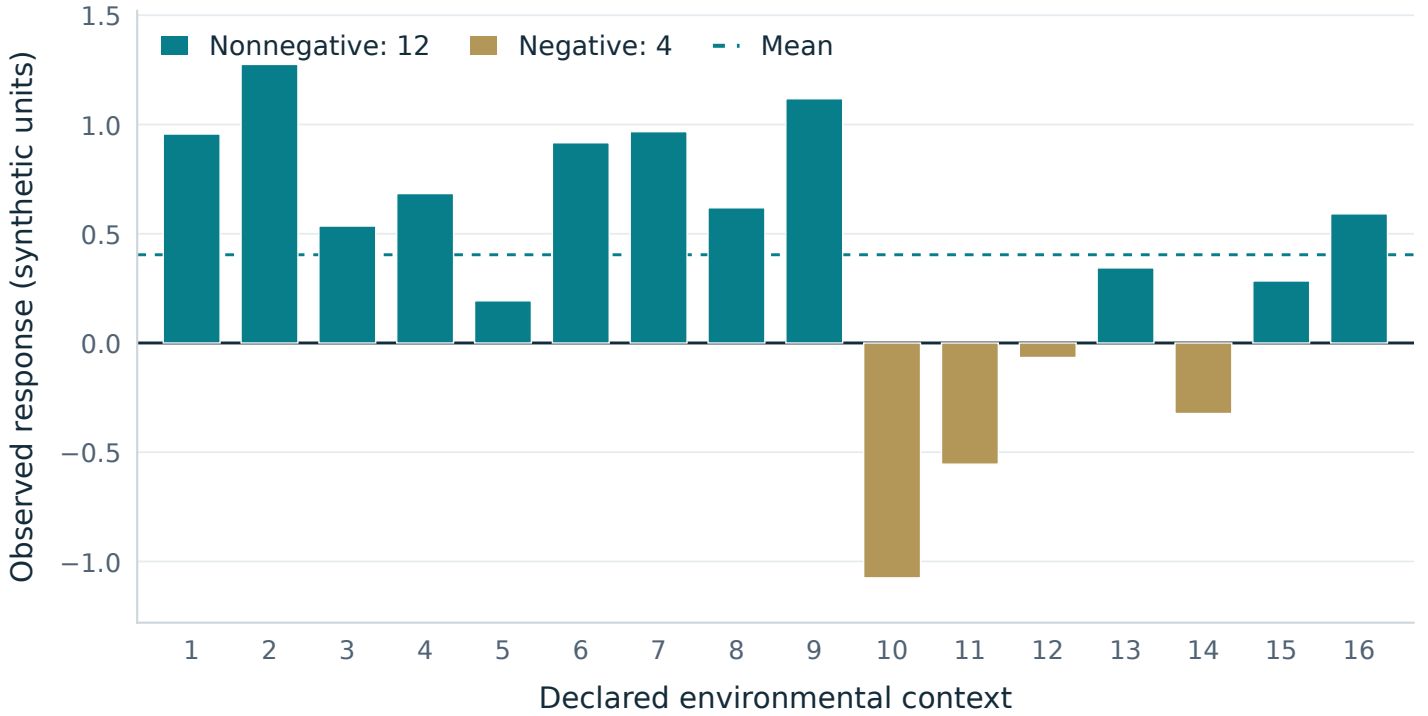
Post-hoc illustrative accepted task

robust-1910214 | 40 total simulator calls, including all 16 final context checks



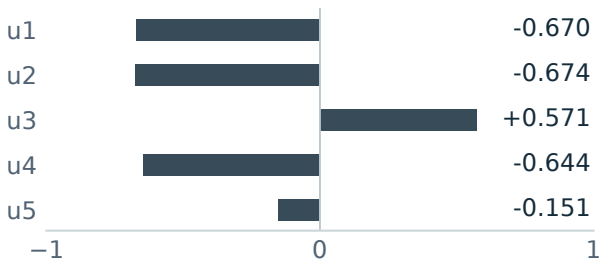
ACTUAL ACCEPTANCE

Mean response **0.403857**
required ≥ 0.4

Coverage **12 / 16**
required ≥ 12 nonnegative

Known control cost **0.90616**
required ≤ 1.2

One control vector for all 16 contexts



All four ordinary configurations failed at the same 40-call budget on this task.

One disclosed synthetic witness; finite-context acceptance does not establish robustness to noise or unseen environments.
